**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohshita et al., U.S. Patent No. 5,107,757.

Regarding Claim 1, Ohshita discloses dewatering system for dewatering a material, the system comprising: a pressure roller dewatering apparatus comprising: two dewatering rollers (Fig. 20, #108, 109) parallel to each other, and at least one water-absorbent draw-in member provided on the external periphery of the dewatering roller (Col. 17, Lines 43-48); a water content-controlling unit (#105, 107) for dewatering the material and for supplying the resulting water-content-controlled dewatered material between the two dewatering rollers, the water content-controlling unit being disposed upstream of the pressure roller dewatering apparatus; and a roller recycling unit (Fig. 26, #120, 121, 122, 126, 127, 128) for removing adhering matter and water from the draw-in member.

Regarding Claim 2, Ohshita discloses a cake removing unit (#128) for removing the cake adhering onto the surface of the draw-in member; a cleaning unit (#120, 121, 122) for cleaning the draw-in unit; and a water removing unit (#126, 127) for removing the water absorbed in the draw-in member.

Art Unit: 1723

Regarding Claim 7, Ohshita discloses a drain unit (#126, 127) for collecting water produced by the roller recycling unit and draining the collected water to the outside of the dewatering system.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohshita in view of Yamamoto, U.S. Patent No. 4,279,760.

Regarding Claim 3, Ohshita does not disclose a transfer roller. Yamamoto teaches a dewatering system comprising a transfer roller (Fig. 1, #5) that makes rolling contact with the draw-in member of the dewatering roller. It would have been obvious to one of ordinary skill in the art to modify Ohshita with the element of Yamamoto because they are both dewatering systems.

Art Unit: 1723

Regarding Claim 4, Yamamoto discloses a scraper (#11) for scraping off the cake provided to the transfer roller.

Regarding Claim 5, Yamamoto discloses a washing nozzle (#13) for spraying water toward the surface of the draw-in member (#3).

Regarding Claim 6, Yamamoto discloses a squeezer roller (#4) for rolling the draw-in member (#3) of the dewatering roller (#1).

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yoon-Young Kim whose telephone number is (571) 272-2240. The examiner can normally be reached on 8:30-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda Walker can be reached on (571) 272-1151. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
